ROUND BETTY
CUSTOM WHEEL CHAIR WHEELS

©Round Betty, LLC all rights reserved

The Enzo is a wheel that is custom styled, light weight, functional, universal fitting and built to withstand everyday use. Some key features you will benefit from this design are a spoke design that will always stay true. No hassles with having to repair or replace loose spokes. This spoke design will allow you to reach through the wheel giving you optimum access under and around your chair. A handring design to allow for multiple mounting width positions. You have the option to pick from an array of colors to customize to your own personal taste. These wheels are manufactured in the U.S.A. and come with a manufacturer's warranty of one year. They have been Finite Element Tested [*FET] and RESNA/ANSI test qualified. So you are getting a product that has gone through structural testing above and beyond industry standards. Which we believe gives you the highest quality wheels on the market.
