

# Research: Spasticity Survey

*Do you have a spinal  
cord injury  
...and spasticity?  
Do you have spasms?  
Do you have muscle  
stiffness or tone?  
Do you have clonus?  
Do your muscles have a  
mind of their own?*

*Then we NEED you!!*

If you have 15-20 minutes, please take our survey.  
You can use the QR code to the left or you can go to the link below

The purpose of this study is to assess how spasticity is experienced by individuals with SCI, which characteristics of spasticity have the greatest impact on activities of daily living and the perceived value of current treatment strategies. We hope that our study will guide future research to look at very individualized spasticity management.
